

## Used Barton Levels

If you are willing to consider a slightly used version of the Barton System, contact **Evelyn Smith** in Arizona. She is our **only** authorized reseller of used Barton levels.

That means any level you purchase from her is legitimate and complete. She also registers each purchase with us, so if you ever want to order extra tiles, you can.

She offers her used levels at a discount, but she usually only has the first few levels of the Barton System -- not the higher levels.

Contact Evelyn Smith, in Arizona, at **480-228-9200**.

Her email is: **etsmith2@cox.net**

Or you can search eBay, Craigslist, or even homeschool chatboards to see if a parent might be offering a no-longer-needed Barton level for sale.

Some parents only have one child who needs to be tutored, yet the levels are completely reusable. So once they have finished a level, they offer that slightly used one for sale on eBay at a \$40 to \$50 discount.

The parent then uses the funds from selling that level to purchase the next one.

If a parent sells each level as their child finishes it, then it costs very little to go through the Barton System.

But **make sure it is complete** -- including the tiles (unless you plan to use the Barton Tiles app). **We do not sell spare parts** (so do not buy a level that is not complete).

We will provide free unlimited support to everyone who uses the Barton System, whether they bought it directly from us or bought it used from someone else.

But **be careful**. Some people are starting to list **illegal counterfeit copies** of the Barton System on eBay and Amazon and Craigslist.

We will **not** provide any support to people who purchase **illegal counterfeit copies**, and we will **not** allow them to use our Barton Tiles app. (You must send in a photo if you did not buy it buy your used level from Evelyn Smith, so that we can check it to ensure it is a real one.)

If you are not sure if a listing is legitimate or counterfeit, please contact Susan Barton. She will take a look at the listing and let you know.
